Increasing your home's comfort starts with a home energy audit from our expert auditor.

Our Colorado-based partner, Lightly Treading, Inc., consistently receives high marks from our customers on their professionalism and advice.

Because an audit only shows you how to increase the comfort of your home and reduce your energy costs, your Lightly Treading auditor can help you take action. They'll answer your specific questions, show you ways to increase your home's comfort and customize a plan to meet your needs.

Standard Audit Cost: \$60

With the Standard Audit, the auditor will:

- Conduct a comprehensive whole house inspection.
- Thoroughly inspect your home's exterior, such as windows and doors, to identify problem areas.
- Analyze insulation levels throughout the home.
- Examine age, efficiency, and general condition of your mechanical systems.
- Perform a carbon monoxide test.
- Perform a basic analysis of your utility bills.

Audit with Blower Door Test Cost: \$90

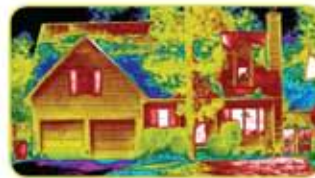

The Blower Door test identifies air leaks – one of the most significant problems that reduce a home's comfort and energy efficiency. If you combined all of the air leaks in the average home, it would equal the size of an open window. The Blower Door Audit includes:

- Everything from the Standard Audit, plus;
- The blower door diagnostic tool to determine how much air your home loses, each hour, through the various air leaks. This air needs to be reheated or recooled, increasing your energy bills.

To qualify for the Standard or Blower Door Audit, you must be a Colorado natural gas and/or electric customer of Xcel Energy.

Audit with Infrared Test Cost: \$120

The Infrared Audit is our most comprehensive energy audit. **The infrared camera is used with the blower door test to deliver a more**

precise diagnosis. The Audit with Infrared Test includes:

- Everything from the Blower Door Audit, plus;
- A better idea of what is happening behind your drywall and areas that can't be seen.
- Scan of the walls and ceilings.
- View of temperature differences to see where insulation is present, missing or where the insulation is just not working effectively.
- The development of more customized solutions to address air leaks, the elimination of ice dams and reduction of overall conditioned air loss and energy consumption.

To qualify for the Audit with Infrared Test, you must be a Colorado natural gas or all electric heat customer of Xcel Energy.

Call us at **800-895-4999** to schedule a Home Energy Audit, or visit us at **xcelenergy.com/HomeEnergyAudit**

Audit services are being offered to you at a substantial discount, up to 60% off.

Put the audit information to work for you. Your Lightly Treading auditor can provide the information you need to get started, including information on Xcel Energy's **Home Performance with ENERGY STAR®** rebate program*.
